Afterwards, on the street, the market was lower under the hammering of the bears, who circulated a false rumor, to the effect that a steamer had arrived from Europe reporting an advance in the Bank of England rate of discount and further depression on the London Stock Exchange. The market subsequently nearly recovered the decline, and closed firm, New York Central advancing % beyond the open board price. At five o'clock P. M. the latter was quoted at 97% a 98, Eric 92%, Hudson River 106%, Cleveland and Pittsburg 92%, Northwestern preferred 66%, Fort Wayne 102%, Michigan Southern 73%. The gold market continued firm, and there was an increased demand for coin loans, which were in some cases made without interest. The opening price was 146%, followed by an advance of % and a decline of %, from which the market strengthened to 145%, and closed steady at that quotation. The shipment of gold by to day's steamers aggregated \$506,013, of which the City of Baltimore took \$464,113 and the Borussia \$438,800, making for the week \$930,914.

Oty of Baltimore took \$464,113 and the Borussia \$432,800, making for the week \$930,914.

The gold certificates intended to be issued by the Treasury Department will not be issued for at least a fortnight to come. Only those of the \$5,000 denomination have as yet been received at the Sub-Treasury in this city, and it is not the intention of the Sub-Treasurer to receive de-posits until the notes of the other denominations arrive. Moreover, as a new department of business will have to be created for the purpose in the Sub-Treasury building, the interval which must clapse before all the certificates are printed will be required to complete the necessary arrangements which must precede the receipt of depo sits. This will involve, of course, a considerable increase of labor, and consequently of expense, in the Sub-Trea-sury, the advantages to compensate for which are at present problematical, although the measure has the support of perhaps the larger portion of the banking community

The foreign exchange market has been stagnant. The rates are nominally the same as quoted yesterday. Leading drawers asked 10834 for their sixty day bills, but sales were made at 108%.

The demand for money on the Stock Exchange has en fully supplied to-day at seven per cent, and the return flow of currency which has set in from the West assists the recuperation of the market from its recent contraction. The Chicago journals note that the banks there have bad to send considerable amounts of currency eastward to meet their drafts, and that exchange upon the East is firm at par buying, and 1-10 premium selling. The fact is that the Western banks had larger balances at the East when the recent stringency set in than they ought to have had, or than was entirely consistent with the interests of the bankers with whom they made their deposits. The rate of interest—namely, four per cent— offered upon deposits by the New York banks has led to much larger temporary balances being lodged here by the country banks than would have otherwise been the The policy is apt at times to prove rather dangers, or at the best inconvenient to the banks at this atre, because they are liable whenever a spasm occurs the money market to have their deposits withdrawn; payment of four per cent upon the latter re quires that they should be constantly kept out at a higher rate. The Western and other country banks allow no interest upon deposits, finding that the risk more than counterbalances the direct gains. The discount line continues active and irregular, but

the actuainy of names is less close, and commercial paper of the best grade passes more freely at 7 a 10 per cent. At Chicago the bank rate is 10 per cent, but out. ade of the banks the regular rate is one per cent per

society to-day at the Sub-Treasury amounted to 1624,600, none of which was in redemption of Clearing fouse certificates. The withdrawals on account of the can since the 5th inst. have aggregated more than weive millions, during which the balance in the Sub-Freasury has declined from \$68,201,310 to \$60,157,697.

The general opinion of bank officers favors a more easy condition of the money market, in consequence of the subsidence of the Western drain and a diminution of that southward. The drain eastward, which has been considerable, has also abated, because the banks in that direction, alike with all the others keeping balances in New York, have drawn the latter so closely that there is little more left to be drawn. In addition to these causes the wise decision of the Secretary of the Treasury, in view of the recent stringency, to order that no more currency be funded into bonds pending the meeting of Congress, is reassuring. This conservative action of Mr. McCulboh cannot but exert a salutary influence upon bankers and others who represent the money market, as well as the entire commercial community, and so relieve a host of appre ns. The policy of returning to specie paymentswhich he very properly has in view-must not be lost sight of; but the resumption of specie payments is of itself a mere dogma, which, like the outline of a figure in painting, requires to be very carefully filled in. A sudden resumption of specie payments would involve an equally sudden fall of prices, resulting in all but universal bankruptcy throughout the country, and the govern ment, cut off from its resources by taxation and other-wise to a large extent, would share in the national disaster, thus postponing the object in view. The country prepare the way to a contraction of the currency and a esumption of specie payments.

The nation is at present in such a peculiar position that great care must be used to avoid monetary convulsions, so that the recuperation of the South and of the interrupted by the curtailment of those ordinary facilities which the loan market, when in a natural state, invariably affords. Of late the abnormal condition of the South has led to the withdrawal of a large amount of currency from the North for the ruhase of cotton, and there has not as yet been remitted in return a sufficient amount in payment for mer-chandise sent from the North to the South; but the chandles sent from the North to the South; but the South is every day increasing its indebtedness to the North, and a counterpoise to the present drain will soon be established by remittances from the South in payment for the goods sent there.

The spasm in the money market, which was in some degree influenced by the funding loan, has shown the svil effect of too precipitate action in

ting the volume of the paper money at an excep-period like this, and Mr. McCulloch indicates cional period like this, and Mr. McCulloch indicates a quick perception of affairs by suspending the funding of the currency. He will, however, we presume, recognize the advisability of preventing any material increase of the currency by gradually contracting it, after a certain time has elapsed, in proportion to the increase through the national bank issues, but not in excess of this. The circulation will thus be kept at its present level, and monestary derangement will be guarded against. Then, with increased cotton and tobacco crops and a general with increased cotton and tobacco crops and a general development of the natural resources of the country, the time will come when specie payments will naturally be suggested, and the transition from paper money to hard cash may be made without incurring those disasters

Petroleum stocks were rather active at the first board.
2 Tithole Creek was especially strong and closed at \$2.05
2 Ligher than at the same time yesterday; Pirst National 6c., Germania 6c. Shade River was 20c. lower, sciosing at \$3.00. SATURDAY, Oct. 22—6 P. M.

The stock market was firm at the early sension of the open board this morning, and at the first regular board a very confident feeling prevailed among buyern. Erie closed & higher than at the second board yesterday, Michigas Southern 1½, Cleveland and Pittsburg 2, Northwestern preferred %, Prairie du Chien 1½, Fort Wayne 1½. Reading was ½ lower, Rock Island ½. Atantic Mail sold at 146. Government securities were dull, and coupon five-twenties declined ½, ten-forties ½.

At the open board at one o'clock the market was strong, and a sharp rise of 3 per cent took place in Fort Wayne, which, after selling at 103½, closed on the call at 102½. Erie closed at 92½, Hudson River (b. 3) 106½, Reading 115, Michigan Southers 73½, Cleveland and Pittsburg 82%, Cleveland and Toledo 103½, Rock Island 107½, Northwestern 30½, proferred 65½, Prairie du Chien 66½, Ohio and Mississippi certificates 28, Canton 41½, Cumberland 43½, Quickailver 43½, Brunswick (b. 10) 11½, Mariposa (a. 3) II.

Afterwards, on the street, the market was lower under the hammering of the bears, who circulated a false rumor, to the effect that a steamer had arrived from Europe restricts the formation of the seventy one banks in this city, as shown by their quarterly statements made on the 2d inst:—

of the Cheago and Northwestern Railroad during the third week in October;—

1864...\$175,982 1865...\$205,829 Increase...\$29,847

The carnings of the Racine and Mississippi and Northern Illinois railroads during the week ending October 21 amounted to \$24.214, which shows an increase over the receipts for the same time last year of \$11.411.

It is stated that it is the intention of the Atlantic and Great Western Railway Company to build a branch road during the coming winter from Randolph to the city of

Buffalo, a distance of sixty miles.

A proposition is on foot to construct a railroad in Michlgan from Saginaw to the Straits of Mackinaw, which would intersect the road from Esconaba to the iron mines of Lake Superior. The contemplated link would be ene

hundred and thirty miles long.

The first contract for grading the Central Iowa Railroad

The first contract for grading the Central Iowa Railroad has been let, and it is the impression that it will be completed to Toledo by the 1st of July next.

The survey for a railroad from Lawrence, Kansas, to Pleasant Hill has been completed, and is found to be the most feasible, practicable and direct route to St. Louis, besides being nineteen miles shorter than the route by Hill is fifty-five and three-quarters miles.

The quantity of flour, wheat, corn and barley left at tide water during the third week in October, in the years 1864 and 1865, was as follows:—

Ficur, bbla.	Wheat, bu.	Corn, bu.	Barley, bu.
186485,800	310,600	318,000	451,200
186534,800	256,000	1,080,700	£08,300

of the age, particularly when it is conceded on all sides that the finishing of it would secure the construction of one of the most important lines of railroad in the whole State. Our advice, therefore, is to let the great "borer" continue its work. It is, we admit, one of those "big jobs" of which both the city and State of New York are never free, like that, for instance, of the enlargement of the battery; but future generations will pronounce it a

The Execution of Champ Ferguson, the Guerilia.

[From the Nashville Union, Oct. 21.]

Champ Ferguson's family—wife and daughter—were with him the greater part of Thursday and all Friday morning, till a few minutes be ore he was ded out to execution. Mrs. Ferguson is a spare, delicate woman, and appeared deeply affected all the time. His daughter was calm until just before the final perting, but evidently deeply felt the horrors of her situation. She, too, is delicate in appearance, and is but seventeen years of age.

It was half-past ten of yesterday when the parting came, and seldom have we witnessed a scene more heartrending. Mrs. F. clung to her husband and wept aloud;—

It was half-past ten of yesterday when the parting came, and seldom have we witnessed a scene more heart-rending. Mrs. F. clung to her husband and wept aloud;—"My God!" my God!" said she "have I not aiready suffered enough? Is my agony never to cease?" and her tears choked her utterance, and she remained long, clasping her husband, who stood litte a marble statue, showing no outward signs of emotion. "Alone, alone, henceforth am I," she at length said, "deprived of my supporter, my husband. Oh, God! is there nothing that will save my husband? Lood! losd! losd!" Then suddenly rising she nerved herself up and exclasmed:—"The heavy champ; de bravely."

"I will," was the response of the condemned.
The daughter, too, was deeply afte ted, and after the two had be a separated from the prisoner it was with difficulty that they could sustain themselves, and but for the assistance rendered them they would undoubtedly have fallen, fainting, to the floor. Criminal—wretch though he was—they loved and adored him; it is human ty. The wile and child clugs to the husband and the father, though a villain of the deepest dye.

The hour of cleven arrived, and Champ was warned that the time had come when he must prepare to die. "I'm ready when you are," said he to Llesteant Chitenden, and he was led out by a guard of eight men to the scaffold. His step was firm, his carriage erect, and his bearing just what it had been from the besinning. He nerved himself up to the occasion; not a shudder marred the tranquillity of his frame; not a change passed over his count-nance.

His hands were pinioned behind him with a strong cord. His dress was a black suit of coarse cloth, but next and clean; and on his hands were black cloves. When he reached the scaffold Colonel Shafter inquired:—"Shall I help you to ascend?" "No," he replied, "I'll walk up myself;" and he did so with firm and unfaitering steps.

On reaching the platform he faced the two or three

walk up myself;" and he did so with 3rm and unfaitering steps.

On reaching the platform he faced the two or three hundred auditors and the guards without blenching, but requested that Dr. Bunting should pray for him. The Doctor compiled with the request, and implered the Throne of Grace to show mercy on the prisoner.

During the prayer the prisoner wept—the first evidence of emotion which he had yet given. Colonel Shafter took a handkerchief and wiped the prisoner's eyes, his own, at the same time, being any other than dry.

After this the Colonel read the charge and specifications against him, Pergoson standing unmoved till he had read the fifth, in which he was charged with murdering the venerable Reuben Woods. When that name was mentioned he dropped his head and looked steadily on the ground for a time. He was evidently affected; remorae had penetrated to his callous heart. But, like Pharaoh, he soon steeled himself against the reproaches of conscience, and he raised his head and braved the worst.

On reading the eleventh specification, in which he is

worst.

On reading the eleventh specification, in which he is charged with murdering an old man named Kizer and his little daughter, he shook his head; and on reading the fifteenth specification, in which he is charged with murdering three soldiers of the Union army, he turned to the Colonel and said:

"I oculd tell it better than that, Colonel."
"I presume you could," was the reply; and the reading was continued.

ing was continued.

From the eighteenth specification to the end, he nodded his head at the close of each, in acknowledgment of his guilt, or rather, as he claimed, in acknowledgment of his exploits in legitimate warfare.

his guilt, or rather, as he cisimed, in acknowledgment of his exploits in legitimate warfare.

\*\*RIS LART SPECH\*\*

After Colonel Shafter had fluished the reading he turned to the prisoner and said:—

"In obedience to this order, Mr. Ferguson, it is my duty to execute you."

"I know it," responded the prisoner.

"Do you bisme me?" inquired the Colonel.

"Not particularly," was the response.

"Have you anything to say?"

"I can't speak much," said the prisoner; "I did some of the acts charged, but not all. Some I know nothing about. I desire, Colonel, not to have my body cut up by doctors, but I want to haveil put in that thing (pointing to his coffin), and taken to the graveyard in White county, Tennessee, and laid there. You won't have me cut up, will you, Colonel?"

"No," responded Colonel Shafter, "you shall not be cut up; your body shall be sent to your friends. Have you anything more to say?"

"Well, whenever you say stop, I'll stop," said the doomed man; "I am under your control; I wouldn't be here if I could help it, but I must, and I must submit. What I am, I am, and I can't help it; but you would not have my body out up, would you, Colonel?"

The Colonel again assured him that his remains should be given to his family.

"I have," continued the prisoner, "some as good friends as any man; but they can't help me now. All I have to say is, I don't want to be cut up by the doctors; will you put my body in that thing"—again pointing to his coffin—"and send it to White county, Tennessee, and have it buried in the old graveyard there?"

The Colonel again assured him that he would accede to his request.

The cap of death was then drawn down over his face, and Colonel Shafter said;—

Raising his bend towards heaven, he said, in a solemn tone:—

"Lord have mercy on me, I pray you;" and as his voice ceased, by a stroke of the are, the support was severed and the drop fell, and the prisoner was suspended between heaven and earth.

The drop fell at precisely twenty minutes before twelve, and he remained hanging twenty five minutes when the body was out down and laid in the coffin and conveyed away. His neck was broken, and he blied profusely at the nose. After he fell his hody moved but twice, and that slightly, so great was the shock of the descent.

On being asked concerning his political faith Ferguson and, "I die a rebel."

While on the scaffold Ferguson recognized a number of acquaintances in the crowd, to all of whom he howed politely, and accompanied the bow with a smile.

His family, after separating from him, went to the large house adjoining the penitonitary to swait the result. His wife was so deeply affected that she was compelled to lie down; his daughter, however, nerved herself up, even to the indignant; for when the announcement was made that all was over she exclaimed:—

"Well, I hope they are satisfied now!"

The drop was cut by Mr. Bantwell, a detective in the service of the government.

The whole Fifteeath colored regiment were employed to guard the grounds, while three companies of the Sixteenth regulars formed a square immediately around the scaffold, and no one was admitted within it except the resporters and correspondents of the various newspapers.

## SCIENTIFIC INTELLIGENCE.

A coal algering machine has on one side, a double engine, which may be worked with compressed air or steam. The cylinders are ten inches in diameter, with a seven and a half inch stroke. The power is used to drive a series of cog wheels which communicate with smaller cogs connected with eleven pairs of augers. These augers are three feet six inches long and two and three-quarter inches in diameter each. At the end of each is a drill, which tapers from a diameter of two and a half inches to a double point. The width of the whole set of augers is four feet seven inches. When in the mine the machine rests upon a small track, along which it is propelled by its own power. Above this track is a pair of trams on which the machine slides backward or forward as the augers penetrate the rock, or are withdrawn, all the motions being performed by the machine itself. It is calculated that fifty per cent of the labor now necessary to take coal out of the pit will be pernow necessary to take coal out of the pit will be per-formed by this digging machine. Its bearing-in power

formed by this digging machine. Its bearing-in power will be from five thousand to eight thousand bushels of coal in ten working hours.

The Social Science Congress of England met in session at Birmingham on October 4, when Lord Brougham delivered a lengthy and very able inaugural on the progress of mind and scientific development in the Old and New Worlds.

at Birmingham on October 4, when Lord Brougham deflivered a lengthy and very able imagural on the progress of mind and scientific development in the Old and New Worlds.

The thirty-second session of the Scientific Congress of France has been held in Rouen. Archæology and history formed the subject of the fourth section, in which were read papers on "The Intrusched Roman Camps;" "The Art. Laws and Geography of the Gauls in the Time of Julius Caesar;" "The Religious and Military Ant of the Thirt enth Century; "The History of Ceramic Art;" The Nationality of Joan of Arc," &c.

M. Millet, a member of the Paris Institute, has reported to the Emperor Napoleon the result of a scientific mission to Greece, undertaken by him last year, in obedience to imperial order. The Island of Thasos, visible from Mount Athos, contains a vust number of unexplored remains of towns, theatres and temples, and M. Millet was fortunate enough to find there several works of art which had escaped destruction at the hands of the peasants, who, see ng Europeans so anxious ahout large stones imarine them to contain treasures, and, therefore, not infrequently break them into small fragments in the hope of finding some. This was the case with a splandid bas-relief, representing a woman in a sitting posture, and holding a casket in her hands. On the frieze the words "Phills, daughter of Cleomedea," were sculptured. The islanders had broken this beartful work of art into ten pieces, and the head having es aped mjory, the whole was shipped off to France, together with three bas-reliefs representing articles connected with the toilet, and dressed in long robes with small folds, and dadems of pearls on their heads, the pearls represented by grains of some metal. These has-reliefs are about three feet high and eight in length, and bear ins riptions in the old Jonan d alect. Besides these, M. Millet sent over five bas-reliefs, two of which represent funeral banquets, and the three others heroes on horseback; also forty marble slabs bearing inscriptions

tended to about each shortened to account the penumbra had shortened to account the penumbra had shortened to account the penumbra had shortened to account the shortened that has been making observations on the deposition of devidence foggy nights, the result of which is a conclusion that in his neighborhorhood, at all events, the amount of dew deposited in four nights was equal to a ton and half per acre.

The silver mines of Konsberg, in Norway, are so far exhausted that the quantity of ore extracted will soon not suffice to cover the expenses of working.

The annual meeting of the American Antiquarian Society has been held in Boston. The report of the council was read by Rev. Edward E. Hale. It showed that the regular duty of the society, of preserving in proper form for reference the material of history, not of one locality only, but of the whole continent of America, has been steadily dacharged in the careful administration of the library. They notice a regular increase of students, who consult it for the material which the past and present generations have so successfully brought together.

An antiquarian discovery of much interest has been made in Fife, Scotland. On the wall of a cave were found sculptured the forms of elephants, birds and fish. It is supposed that in the early ages of Christianity the cave was used as a place of worship by anchorites, and that St. Adrian dweit in it.

Professor Shell, of Amherst, Mass., states that he has not during twenty-seven years recorded so small an amount of rain for a single month as during the month of September last. The water measured only thirty-eight bundreths of an inch.

The new bridge about to be suspended over the Ohio river at Cincinnatt, will be the longest structure of the kind in the world, being more than two thousand feet longer than that over the Nisgara river, and five hundred and droty feet longer than the Menal Bridge, England. Its total span will be one thousand and fifty-seven feet. The stone piers rise one hundred feet above their foundations. One year is allowed for building it.

An immense bridge is being built ever the Rhine, between Mannheim and Ludwigshaven, to be completed

the Navy.

ABRIVAL OF THE UNITED STATES STRANSHIP
SOUTH CABOLINA.

The United States steamable South Carolina, from Philadelphia, having the United States steamers Cornubia
and Clyde in tow, arrived at the Brooklyn Navy Yard on

the 24th inst.

The South Carolina brings a large quantity of paymaster's stores from New Orleans, which port she left on the lat inst., arriving at Philadelphia, via Pensacola and Key West, on the evening of the 16th inst., with the remains of the late Commander Downes on board. This vessel encountered a heavy sea and strong winds during the passage, and was off Cape Hattersa in the gales which proved so fatal to the steamship Atlants. During the passage two sailors were washed overboard by a heavy sea. Every exertion was made to save them, but were only successful in rescuing one of the unfortunate men. The South Carolina spoke the bark Olivia Davis, twenty-six days from Mobile, in distress, and found that she was out of provisions. Her wants were immediately supplied. The following is a list of the officers of the South Carolina:—

Acting Volundeer Lietchenaut Commanding—William H. Kennison.

Acting Master and Executive Officer—John Lear.

Acting Master and Pilot—William Nelson.

Acting Master and Pilot—William Nelson.

Acting Passed Assistant Surgeon—George B. Tood.

Acting Passed Assistant Surgeon—George B. Tood.

Acting Assistant Paymaster—George S. Mead.

Engineers—Acting First Assistant, J. T. Hathaway;

Second Assistants, Joa G. Dennett, T. W. King, G. E. Whitney; Third Assistants, G. Shrader, E. C. Blackwell, W. S. Arthur.

Coptain's Clerk—Will J. Livingston.

Paymaster's Steam d—Herman Schultz.

DEPARTURE OF VESSELS.

THE NEW SLOOP-OF-WAR MADAWASKA.

The new sloop-of-war Madawaska (twenty guns) is now in the dry dock, Brooklyn Navy Yard, receiving her copper sheeting. She is a splendid model and will, no doubt, develop great speed.

AN INSPECTOR ON A VISIT.

Commander Wise, United States Navy, Chief of the Bureau of Ordnance United States Navy, paid an official

Bureau of Ordnance United States Navy, Chief of the Bureau of Ordnance United States Navy, paid an official visit to the Brooklyn Navy Yard yesterday. The object of his visit was to confer with Commander Mullaney in regard to retrenchment in the ordnance department of the yard. INSPECTION OF MAIL STEAMERS.

INSPECTION OF MAIL STEAMERS.

It has been determined by Chief Engineer King and Naval Constructor Delano, the supervising inspectors of seagoing United States mail steamers, to rigidly examine all scagoing steamers carrying the United States mails, with a view of employing only those whose sea and steaming qualities are of the right character. They also intend to prosecute to the full extent of the law any steamers illegally carrying the United States mail flag.

WINDOSKI AND ALGONQUIN. The third dock trial between the gunboats Winooski and Algonquin will commence next Tuesday. The run will be for ninety-six consecutive hours, both vessels to use as much coal, carry as much steam as those in charge please, the vessel making the greater number of revolutions in the given time to be declared the superior one.

Who Has the Power to Remove an Exe cution?
MOTION TO BE RELIEVED FROM THE PURCHASE OF

REAL ESTATE.

SUPREME COURT—CHAMBERS,

Before Judge Ingraham.

In the Matter of the Petition of Margaret R. Bull for Sale of Real Estate.—A very interesting case in practice came up before Judge Ingraham yesterday afternoon, on a motion made by the counsel of Mr. John Kerr to release him from the purchase of certain lots of real estate bought by him at a referee's sale last July. The ground of the sale was a supposed-defect in the title, the property being devised in trust to executors, who, on the sale leain gerfected, did not all join in giving a deed, one of them having been removed in consequence of absence in Europe. The property in question was devised by a Mr. John Tonnele to three executors, in trust for his granddaughter during her lifetime, and after her death to her lawful issue, or in default thereof, to Mrs. Susan Hall and Mr. John Tonnele, Jr. The will was proved in 1849 and all the executors duly qualified. In 1863 one of these executors went to France, and was removed, in consequence, from his office by the Surrogade. In 1849 and 1865 two bills were en cited by the Legislature on the petition of Mrs. Bull, whereby the Supreme Court was authorized to direct the sale of the fee of the property on notice being given to the remainder mu. The property was sold, and the deed tendered was executed, as above stated, by only two of the executors—Valentine G. Hall and George Hall, together with Mrs. Bull and her husband. The question now raised is, whether the absent executor, Berger, should not also have joined in the deed. It was contended that his removal by the Surrogate did not disqualify him, because the Supreme Court alone has power to remove him; that the remainder men likewise should have joined in the deed, and that Aloise Tonnele, Jr., would unite in the conveyance if desired or execute release, and as to the question whether Berger should also Join, the Court, after Tengthy argument, reserved its decision.

Bobinson and Scribner, for Mr. Kerr; Newhouse, Whelp and Van Brunt for Mrs Bull. Recorder Hoffman, as the referee in the case, was also present, and t

or create release, and as to the question whether from one hundred and eligity to two hundred and to by feet of agitta. The works were commenced on June 20, 1843.
